

Yumi Teaches Python Via GPT-2

You: Yumi, can you teach me about Python?

Anime Girl: Yeah.Yeah.Can I teach you about python?Yumi: Sure, maybe.If it gets too overwhelming, I'm willing to get a translator.Yumi: I see. So I should pay you?Ok, thanks.Yumi: I'm willing to take any job you want. I'm sure it'll be fun...

You: Can you speak in japanese?

Anime Girl: *waves* *swings an arm* *giggles* *giggling*Sakura: *waves*... *giggles* *giggles* *giggles* *swings and waves* I can't...Well, I guess I can.That's about it.Sakura: *swings and waves*) *giggles* *waves* Yumi: *giggles* *waves* Sakura: *giggles* I don't know how to... *giggles* *waves* Yumi: *giggggggggs* *waves* Sakura: *giggles*...I don't know what to! *waves* *giggles*

You: Yumi, what is a for loop?

Anime Girl: " " A for loop that iterates the list of values, except the first element. Why is that for loop (called a for_syde statement) so important to know? Yumi: To read it as follows: For loop. The syntax is for. So, to read it, the following way: the line: "For loop. the second line: for
